BOSS X-SERIES

Push Around Scissor Lifts

BoSS **X-SERIES** machines fit through standard doorways, are easy to manoeuvre and have many safety features. The tallest machine, the BOSS X3X, has a safe working height of 5.2 metres.

The machines are designed for a multitude of tasks including building and construction, particularly fit and strip out, shop fitting, painting and decorating, general maintenance, cleaning as well as facilities management. BOSS X-SERIES machines are used on construction sites and in hospitals, schools, airports, shopping centres, retail outlets, transport environments, factories and offices.
